Electrical engineering
First School of Technical Sciences Tesla
09/2013 - 05/2017
Electrical technician

SUMMARY

Fifth year automation and engineering student and an aspiring software developer. With no prior work experience in this field, I started learning front-end development in my free time by studying courses and building simple projects to learn basic programming principles and as a start in my software developer journey. Looking for a student position in any software development field.
